

# DV Net Installation and Set Up

- **Insert CD into your computer's disk drive.**
- **If the CD does not autorun, go to "My Computer" and double-click on the CD drive.**
- **Double-click this icon.**

- **Follow the prompts to install DV Net.**
- **After installation this icon should appear on your desktop.**

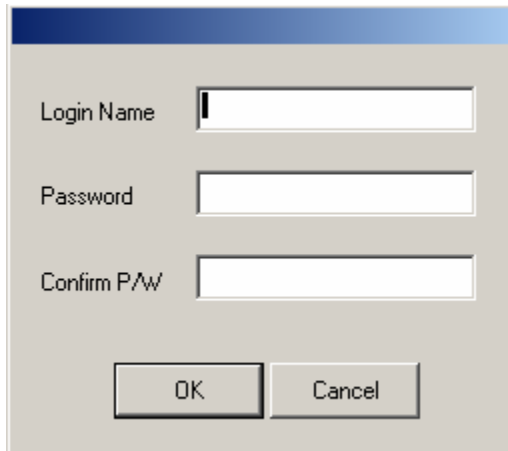

- **Double-click the DVR-Net icon.**
- **You will then see this box.**

A dialog box titled "LOG IN". It has a grey background and rounded corners. At the top, it says "LOG IN". Below that, there are two input fields: "LOG IN NAME" with the text "crs" and a dropdown arrow, and "LOG IN PW" which is empty. Below the input fields is a checkbox labeled "minimized screen". At the bottom, there are four buttons: "Login", "New", "Edit", and "Cancel".

- **Click on the "New" button to create a new account for the software. (this has nothing to do with the log-in information saved on the DVR, and therefore does not have to be the same.)**

- Enter your desired username and password in the following box, and click “OK”.

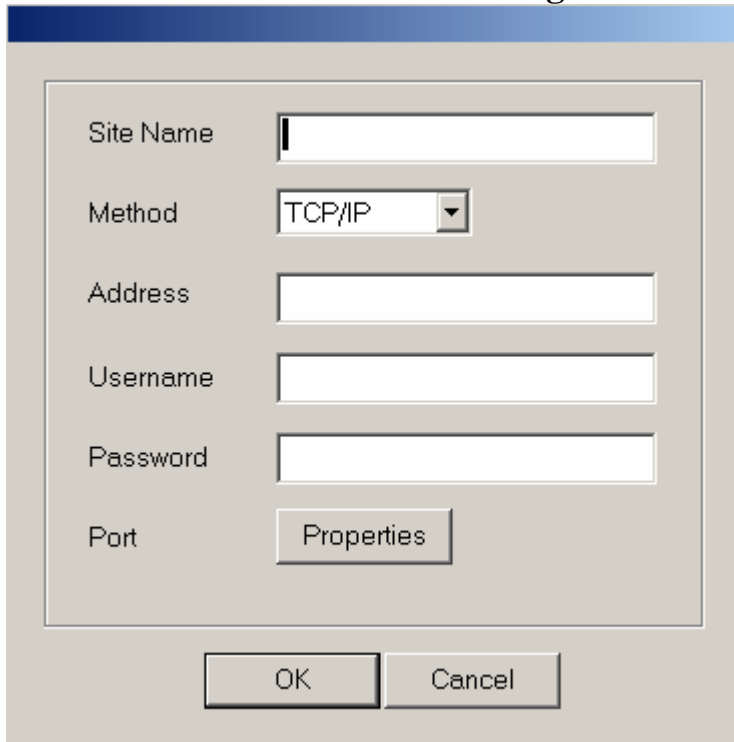

A dialog box with a blue header bar. It contains three text input fields: "Login Name", "Password", and "Confirm P/W". Below the fields are two buttons: "OK" and "Cancel".

- In the next screen, select the second option from the column on the left.

Site Setup

- Click on the  button to get the following box.

A dialog box with a blue header bar. It contains several fields: "Site Name" (text input), "Method" (dropdown menu with "TCP/IP" selected), "Address" (text input), "Username" (text input), "Password" (text input), and "Port" (text input with a "Properties" button next to it). At the bottom are "OK" and "Cancel" buttons.

- Enter the Information for the desired DVR. The “Address” is the public IP for the host site. The “Username” and “Password” must coincide with the information entered in the DVR, and not that which was entered at the beginning of this installation process.

- After entering the host's information, click , and then click . If you do not click "save" before proceeding, your settings will be lost.
  - Select  Setup Connection Mode from the left column.
  - Select "Single".
  - From the drop-down dialogue box, select the host you have set up.
  - Click , and then .
  - The DV Net software should open, and connect to your host.
- 
- Once the host is set, you simply click the  icon on your desktop, and log in. The software will automatically connect to your host site.
