

Maximize your business profits, employee scheduling, cash flow and improve customer satisfaction with InfoTouch® software systems.

With thousands of registers on three continents, over 200 different vertical markets being serviced successfully since 1986, you can put your trust in InfoTouch® software! We deliver stable, reliable, progressive solutions to successfully enhance your cash flow and increase your profits in a wide variety of retail environments.

Touch: InfoTouch software systems use intuitive graphics at the POS to reduce training time, speed check-out times and enhance your customer service. The software improves retailers' inventory control, helping to cut costs while minimizing profit eroding, out-of-stock frustrations.

PCI: All InfoTouch software platforms have been certified PCI (Payment Card Industry) compliant twice. InfoTouch was one of the first software companies to become fully compliant with the credit card industry's encryption standards. Make sure all your data processing is properly encrypted by choosing an InfoTouch system.

Hybrids: Today many successful retailers are combining unique blended inventories and service offerings to realize greater profitability and widen their customer base. These hybrid retailers seek flexible, adaptative software that doesn't limit their offerings and cash flow. InfoTouch provides these pioneers a robust stable solution, allowing them to successfully manage and market their business.

InfoTouch software systems

Take control of your costs and your profits! Manage your inventory, scheduling & cash flow! Market to and expand your customer base!

Standard in all Platforms

Register: The graphic touch screen interface helps cashiers with both speed and accuracy at the Point-Of-Sale (POS). You can scan or enter a UPC/SKU, hit an item button or you can do a wildcard search to enter or find any item in the database. Full customer sales histories are available at the POS along with layaways, quotes and special orders. Easy cash drawer reconciliation, integrated loyalty program and age verification are all standard features.

Inventory: All InfoTouch Systems update the quantity on hand for each inventory item in real time. Additionally, each item can have a retail price plus 9 additional price levels and be sourced from up to 10 different vendors. You can maintain serialized as well as a wide array of sophisticated pricing levels - such as Quantity Unit Pricing, Fractional Quantities, Buy 1 get 1 Free, Case Pricing, % off after 10 items, etc. Additional functions include Kit/Explosion Sales, Substitution and Suggestive Selling, Alternative keys and Open to buy for Department Budget tracking. Bar code label printing and Item Price Labels are standard along with the software supporting any sale of items by weight.

Why Touch Screen is the right choice:

- Touch screen systems help reduce training times by 30%
- Touch is more durable in a harsh retail environment
- Touch uses less of the prime merchandising counter space
- Touch produces 33-50% checkout throughput improvement
- Touch substantially reduces errors at the point-of-sale
- Touch improves customer service for your clientele!

| Sport / Golf Pro Shop | Consignment Stores |
| Candy / Chocolate | Car Wash / Car Service |
| Yogurt / Coffee Shop | Grocery Stores |

Over 200 retail platform solutions available

Standard in all Platforms

Employees: Time, attendance and gross wage calculations are at the center of the employee module. All employees can clock in/clock out through any register in the system while managers can monitor and adjust these entries accordingly. In addition to hourly and salaried wage rates, the system calculates individual or group commission plans, individual or group bonuses, contests, and incentives for employees. Employee shift scheduling is also available.

Purchase Orders: Integrated with the Inventory module, purchase orders can be created automatically using the Min/Max/Reorder quantity scheme, sales history, or by specific vendor, lowest cost or fastest delivery time.

Reports: You have access to an enormous amount of information with the 100+ reports that come standard. Most reports have multiple search and sort criteria giving you maximum flexibility in analyzing your operations. All reports come with the option to view on screen, print or save for export to other applications. In addition, you have access to extensive documentation and online help.
